VII National Tournament Quality Cup Presidential Coffee 2021

I. Description

Tacuara! Farm – Tacuara! Micro Lot

The Tacuara! micro lot of Mr. Juan Carlos, represents the Yungueña region of the municipality of La Asunta. The production of coffee in this municipality in many cases is relegated by other crops, however, despite this in his municipality there are more than 300 producers among old and new, the production in particular tends to be of the Castillo variety due to its great tolerance to rust.

Mr. Juan Carlos, has opted for the Java variety, in a warm municipality with the presence of important slopes and irregular relief known as the Yungas belt characteristic of coffee-growing areas in Bolivia.
