

# VI National Tournament Quality Cup Presidential Coffee 2020

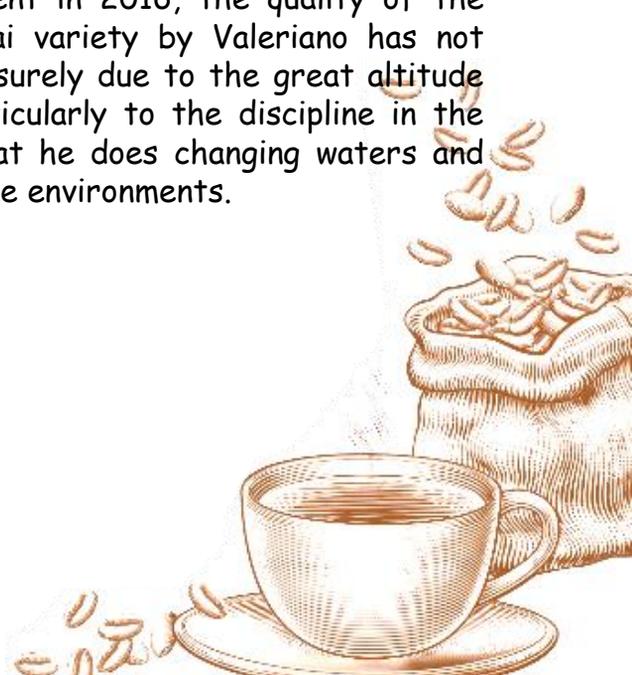

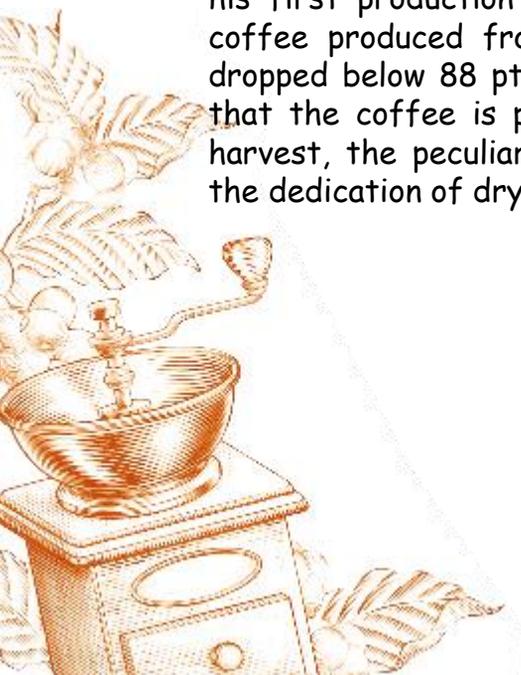

## 1. Description

### The San Jose farm – San Jose micro lot

San José or San José guild of Villa Tunari-Cochabamba, is a community of vegetable producers, its excellent climate at high altitude made technicians and producers realize its potential for coffee harvesting, but its quality was made known by Valeriano callejas Ticona In 2017, when he won the Third Version of the National Presidential Coffee Quality Cup Tournament, at that occasion his micro lot coffee reached 92pts in quality and was auctioned at 53.20 USD per pound, reaching the record price in auctions of a Bolivian coffee.

Valeriano is a very humble coffee producer, together with his family are committed to produce high quality coffees, as a proof he has begun to plant Tipyca or Creole variety coffees associated with shady trees and rare handled pines.

The consistency of the beans produced by Valeriano is very high, since his first production for the tournament in 2016, the quality of the coffee produced from the Red Catuai variety by Valeriano has not dropped below 88 pts. In cup, this is surely due to the great altitude that the coffee is produced and particularly to the discipline in the harvest, the peculiar fermentation that he does changing waters and the dedication of drying in marquee-type environments.
