## **1. Description**

### **Toborochoi Farm – Bello Horizonte Micro Lot**

The Toborochoi farm, is located in the Bello Horizontes community of the Cruz Playa territory in the province of Caranavi, at 1550 meters above sea level. Inside there are 4 varieties of coffee, Catuaí, Castillo, Java and Marsellesa distributed in a 2.5 hectares plantation. Our specialty, is focused on carrying out quality processes, through controlled fermentation applied to the red, black and honey processes. To carry out these processes we take into account the optimal sensory maturity of the cherry, or as a good harvest with cherry or yellow cherry fruits would say, the safety throughout the process avoiding the contact of the cherries with the ground, and the washing of the cherry after the buoying process.

For red honey coffee, the fermentation time, temperature, and ph were taken into account in the processing stage. For the natural, the temperature and the fermentation time were considered, in both cases by controlling the entry of oxygen. The processes carried out on the farm seek to highlight all the attributes of the grain, so that these in turn can be tasted by consumers, we stand out for following a protocol and / or methodology that was validated through a trial and research error, whose results were sensory evaluated, thus helping us to determine the appropriate processing.
