VII National Tournament Quality Cup Presidential Coffee 2021

1. Description

Uchumachi Farm – Micro Lot

Juan Carlos and his family, being traditional producers, decided to dedicate more time to the cultivation of coffee, giving their coffee plantations better agronomic management and better care, in addition to adopting the use of inputs, such as bio-red. They have not neglected the processing of coffee, venturing into natural processes, honey and washing, they are in this in constant learning.

Currently, they are dedicated to the cultivation of the Geisha variety coffee, of which they have a total of 6.000 plants and the Java variety, with 1.100 plants. They recently stopped cultivating the Caturra variety, because they are susceptible of having another plantation to take care of.
